Your path to AI solutions

PFE Internship Book

WHO ARE WE

With over 20 years of experience in AI and computer vision, we thrive on extracting meaningful insights from even the most challenging data. We specialize in transforming bad quality data and navigating situations where data is scarce or uncertain. By uncovering hidden patterns and trends, we empower you to make data-driven decisions that drive growth.

OUR SPECIALTY

We excel in transforming bad quality and scarce data into valuable insights and intelligent systems, ensuring you make informed decisions in challenging situations.

OUR VALUES

Innovation

We look for innovative solutions to our problems, pushing creativity and ambition

Quality

We always give our best to our partners and clients

Collaboration

Whether its our team members or our clients, we're united to provide better technology

WHY YOU SHOULD JOIN US

- You'll get to work on advanced technologies and try to solve complex problems
- You'll work with a great team of both experts and ambitious learners
- Every idea matters, we always brainstorm together and try to find innovative solutions
- A recruitment opportunity

MISSION N°1

Marketing and Content Creation

Join our team as a Marketing and Content Creation Intern! You'll play a key role in developing engaging marketing material for our website and social media platforms. Showcase your creativity by crafting compelling demo videos that highlight our product features and value. This is a great opportunity to enhance your skills in content creation and digital marketing while contributing to a fast-paced and innovative environment.

Skills Required:

- Strong creative writing and communication skills
- Proficiency in graphic design tools (e.g., Canva, Adobe Suite)
- Experience in video editing and production
- Basic knowledge of social media platforms and trends
- Fluency in English and French (written and spoken)
- Attention to detail and ability to meet deadlines

Duration: 4-6 months

MISSION N°2

Mobile App Development Intern (AI-Powered Social Environment)

We are looking for a Mobile App Development Intern to help create an innovative social environment app. The app will feature advanced AI components powered by deep learning and computer vision, including face recognition, emotion detection, and age and gender recognition. This is a unique opportunity to combine mobile development with cutting-edge AI technologies.

Skills Required:

- Proficiency in mobile app development (iOS/Android, Flutter, or React Native)
- Experience with Python and popular deep learning frameworks (e.g., TensorFlow, Keras)
- Familiarity with computer vision techniques and libraries (e.g., OpenCV)
- Strong understanding of AI concepts and neural networks
- Problem-solving skills and a passion for innovation

Duration: 4-6 months

MISSION N°3

Mobile App Development Intern (Assistive Tech for Visually Impaired)

We are seeking a Mobile App Development Intern to contribute to the creation of a mobile app designed for visually impaired users. The app will feature money recognition, shopping assistance, and other accessibility tools powered by computer vision and deep learning. Interns will be fully integrated into the development process, gaining hands-on experience in creating innovative solutions for accessibility.

Skills Required:

- Proficiency in mobile app development (iOS/Android, Flutter, or React Native)
- Experience with Python and deep learning frameworks (e.g., TensorFlow, PyTorch)
- Familiarity with computer vision techniques and libraries (e.g., OpenCV)
- Strong problem-solving skills and attention to user needs

Duration: 4 - 6 months

MISSION N°4

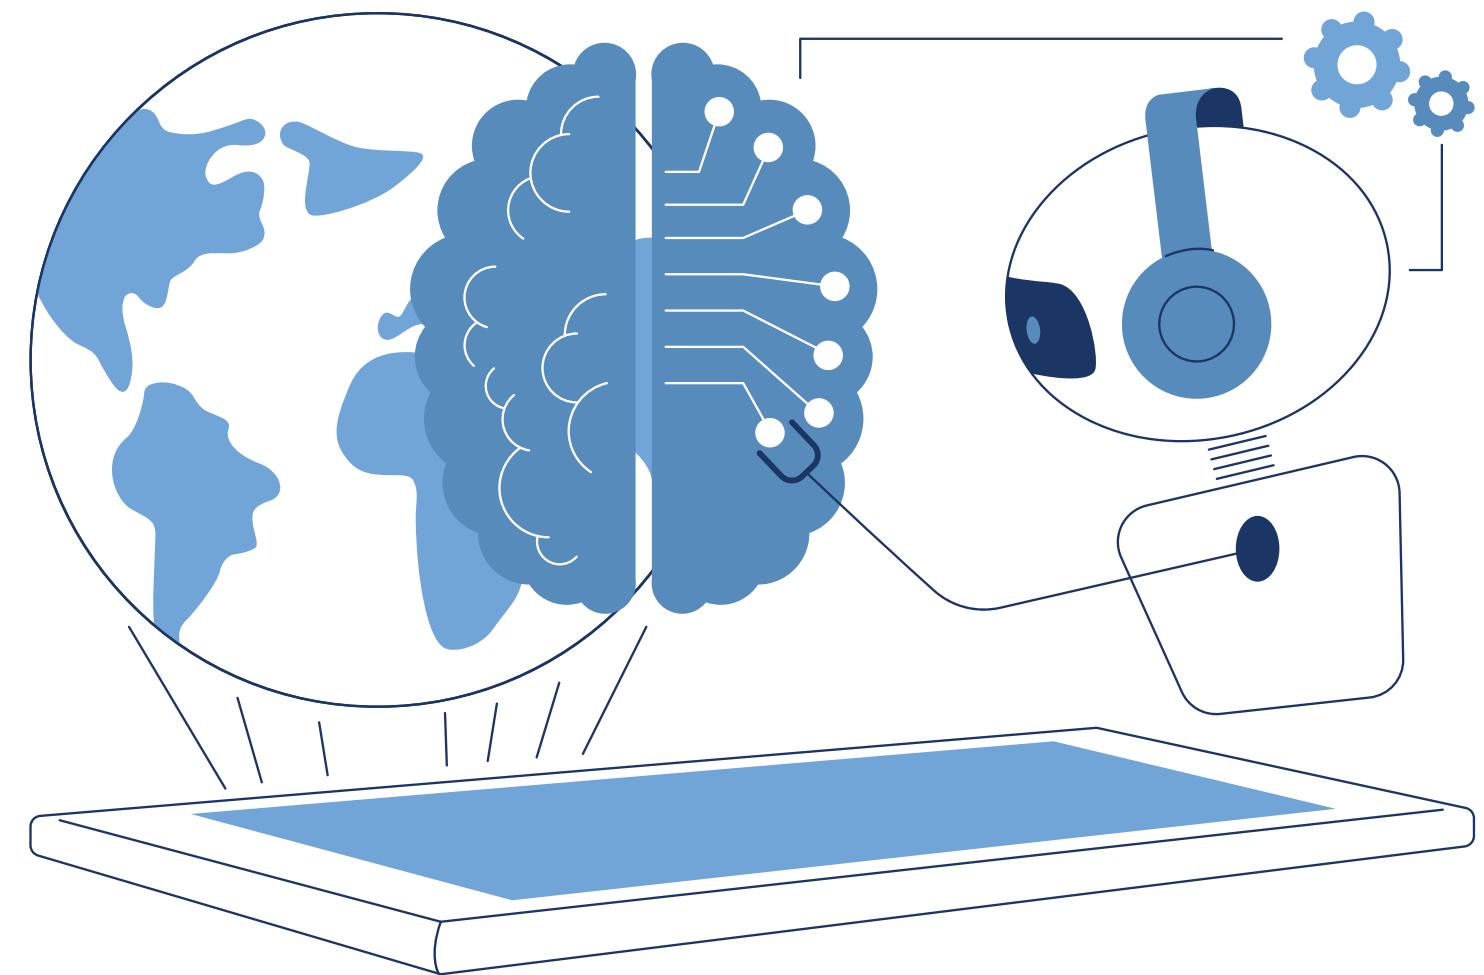

Web Development Intern (AI Integration and Deployment)

We are looking for a Web Development Intern to assist in the creation of a demo website for an AI solution with both front-end and back-end development. The project will involve data collection, database management, and the integration and deployment of an AI solution. This is an excellent opportunity to work on a full-stack project while gaining hands-on experience with AI deployment in a real-world application.

Skills Required:

- Proficiency in web development (HTML, CSS, JavaScript, and frameworks like React or Angular)
- Experience with back-end development (Node.js, Python, or similar)
- Knowledge of databases (SQL or NoSQL)
- Familiarity with integrating and deploying AI solutions
- Strong problem-solving skills and attention to detail

Duration: 4-6 months
